 Para una tapicería óptima y de calidad, es necesario filetear los cortes de la tela o en su defecto dejar una pestaña de mínimo 2 cm en el momento de confeccionar, especialmente en los cortes que se realicen por la trama de la misma.

 For an optimal and quality upholstery, it is necessary to fillet the fabric cuts or leave a minimum of 2 cm flange at the time of making up, especially in the cuts that are made by the weft of the fabric.

 Recomendamos en el proceso de tapizado y donde haya contacto con la tela, usar pegantes incoloros únicamente; especialmente en los colores beige y blancos.

 We recommend in the upholstery process and where there is contact with the fabric, to use colorless glues only; especially in beige and white colors.
